

Patent search:

As the name implies, Patent search is a methodology to efficiently screen and trail existing patents, recently published patent applications. At **Thecompany** we perform the patent searches on a methodical basis with state-of-the-art infrastructure and well trained resources.

With our service you could,

- Validate the worthiness of your innovation or creation
- Steer clear of probable infringement charges
- Establish potential partnerships
- Discover likely licensing chances
- Keep an eye on evolving trends in terms of technology
- Trim down your R&D investments
- Spot out rivals/competitors in your area of specialization

The **Thecompany advantage:**

We customize our patent search services to fulfill the expectations and requirements of our clients. We offer cutting-edge patent search using latest state-of-the-art technologies. Our patent search examining tools are on par with the applications used by the patent examiners, we perform category and sub category searching with full integrity. We deploy keyword Boolean search strategies along with patent image retrieval. We offer unparalleled results within the prescribed time limit. We offer searches that are lucrative, punctual, and comprehensive. Our methodical and comprehensive searches comprises of

- Global client base with applications from more than 150 countries
- Searching over 50 million patents
- IPC (International patent classification) class searching on every search.
- Advanced research technologies like LSA (Latent Semantic Analysis) deployed.

5 reasons why use our services?

- Cost-effective service
- Searches start @ \$300 for mechanical inventions that are of average complexity.
- We uncover important prior art that regular Boolean keyword searches might miss out.
- USPTO examiners are consulted as per client's request for novelty searches.
- Customized and precise search reports to suit the client's requirements.

How do we do this?

We kick start the work in the next working hour once the NDA has been signed. The team comprises of skillful, experienced, MDs, PhDs, former patent examiners/patent agents – all these blended with the latest technology. The searches are based on the following criteria.

- Area/technology of interest
- Period of first search
- Published patent applications
- Relevant patent applications
- Issued or published patents
- Rate of recurrence of patent observation (e.g. weekly/monthly etc.)
- Kind of corporate body (e.g. parent, ancillary, both, etc.)

Value added services:

Rush searches: Rush searches are too available for additional cost.

- Includes all the features of a standard search.
- It is accelerated
- TAT – 7 working days

Search on the spot: We undertake on spot searches too depending on the complexity of the search.

- Includes all the featured of a rush service
- TAT – 24 hours

Click here to know more why you definitely need a patent search?

Points to ponder:

- You can evade spending your valuable time and money on a creation that already exists.
- You can verify the patentability of your innovation before applying for a patent (as patent application process is expensive and detailed)
- There are chances that your new product can infringe on any patents those in use. By this way you can keep away from pricey infringement lawsuit.
- Identifying the miss-outs of the existing technology related to the product.
- Get a chance to fix the gaps in the existing technology through your innovations.
- Through patent search, you not only stir your product rather identify your competitors and many a times “potential partners”
- You can know the originality/uniqueness of your invention much before applying for patent (US patent and trademark office takes nearly 2 to 3 years to examine on US patent applications)

- March ahead of your competitors with the help of patent search services
- Decide on the worth and legality of a patent before it is licensed.
- Patent searches can educate you on the product/creation's significance and legitimacy before selling or purchasing.
- Trend setting is possible at certain points when it comes to technical areas through patent search
- There are chances of even expired patents staying live in public many days after expiry. Such cases can also be identified with patent search services.
- Patent search helps you use the product without spending a penny as royalty fee.
- Analyze and strengthen your company's patent portfolio with effective patent search services.
